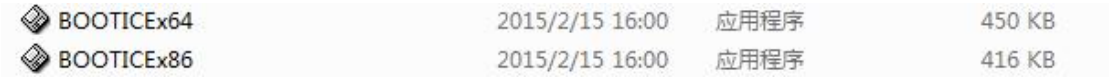
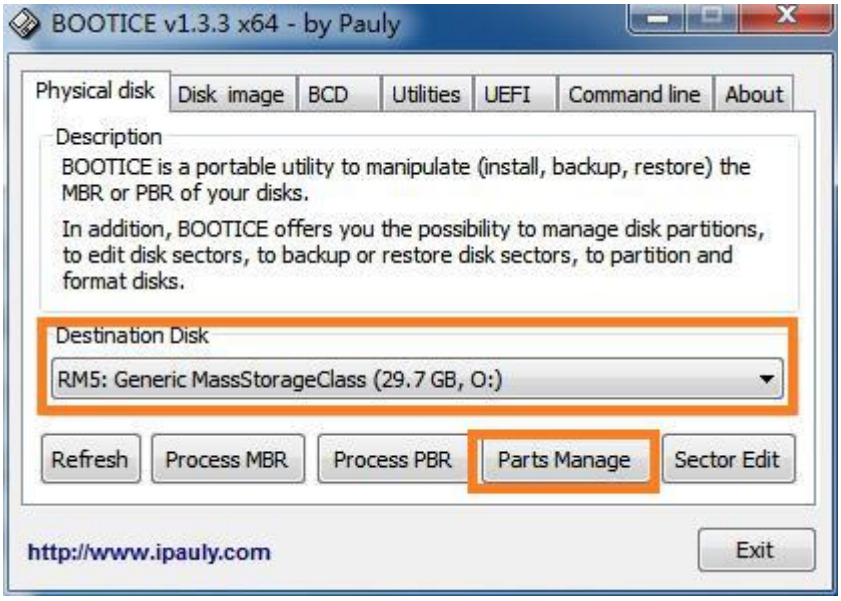
Transferring Roms

0. If your computer system is the latest version of windows10, please see step4 and step5 only.

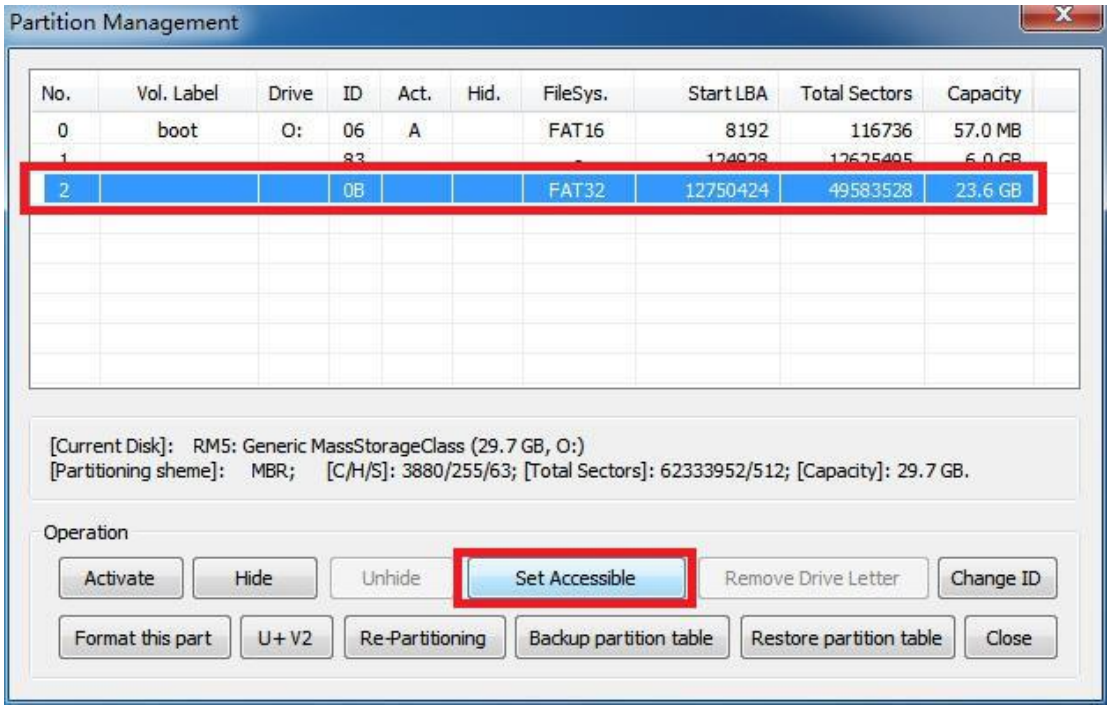
1. Insert the tf card into the computer with a card reader and open the "BOOTICE" software.



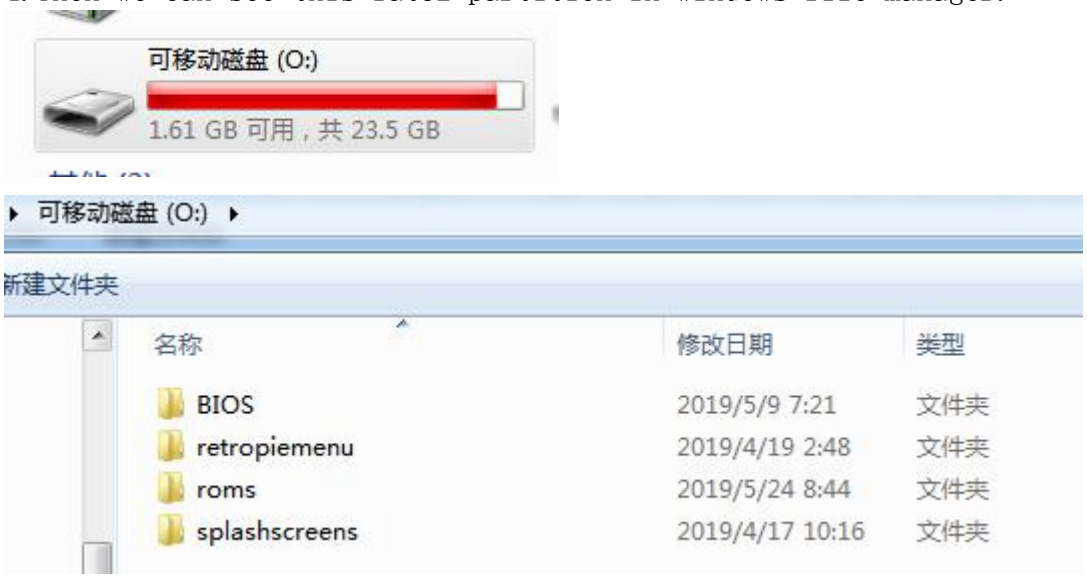
2. Choose the tf card disk and select the "Parts Manage" options.



3. Then you can see three partitions. Choose the fat32 partition and select "Set Accessible"



4. Then we can see this fat32 partition in windows file manager.



5. Then add the roms to their respective folders.
